SUMMARY:

Skilled software developer proficient in Angular, React, MongoDB, Node.js, and Express.js. Capable of building robust web applications and collaborating effectively within teams. Committed to staying updated with emerging technologies and continuously enhancing skills to drive innovation and excellence in software development.

SKILLS:

Frontend Technologies: Angular, React, TypeScript, JavaScript, HTML5, CSS3, Bootstrap

Backend Technologies: Node.js, Express.js, MongoDB, Python, FastAPI

Architecture: Microservices, Client Server, N-Tier

Design Pattern: MVC (Model-View-Controller), Singleton, Observer

Authentication and Authorization: Open Authentication (OAuth), Auth0

Version Control and Collaboration Tools: GitHub, Git, TFS (Team Foundation Server), Npm (Node Package Manager)

Containerization and Orchestration: Docker, Kubernetes

WORK EXPERIENCE:

Software Development Engineer

(Sept 2023 – Present)

Zero Pixels, Infopark, Kochi

- Implemented and optimized Auth0 authentication workflows in MEAN stack applications, enhancing security and reducing login times.
- Led the design and execution of scalable solutions, ensuring seamless integration of MongoDB for a growing user base in a performance-driven environment.
- Angular, React, Node.js, Express.js, MongoDB, Git, GitHub

Software Development Engineer

(Oct 2022 – Sept 2023)

Fakeeh Tech, Technopark, Trivandrum

- Restructured the project in an Angular-compatible format to enhance readability.
- Optimized the project's bundle size, resulting in improved performance.
- Created a separate library module for multiple project development.
- Ensured scalability and efficiency of the library module.
- Developed a dynamic form component for use across different forms with varying styles and functionalities.
- Angular, Angular Material, Bootstrap, CSS3, HTML5, TFS

PROJECTS:

agt360image-view

NPM Package for Angular to View 360 Images

- Developed an Angular npm package facilitating seamless integration for viewing 360 images.
- Implemented smooth navigation controls and customizable settings to enhance user experience.
- Technologies used: Angular, TypeScript, npm
- GitHub Repository: <https://github.com/Aswinthgt/agt360image>
- NPM Package Link: <https://www.npmjs.com/package/agt360image-view>

agtcalendar

NPM Package for Angular to View calendar

- Created an Angular npm package for easy integration of calendars with various viewing options (month, week, day).
- Ensured robust functionality and intuitive user interface design.
- Technologies used: Angular, TypeScript, npm
- GitHub Repository: <https://github.com/Aswinthgt/Angular-Calendar>
- NPM Package Link: <https://www.npmjs.com/package/agtcalendar>

authpro

Authentication Project for Open Authentication

- Implemented an open authentication project using Angular, providing flexible and secure authentication mechanisms.
- Ensured scalability and reliability of authentication workflows.
- Technologies used: Angular, TypeScript, OAuth
- GitHub Repository: <https://github.com/Aswinthgt/authpro>
